

Chariot WORKS MOBIL

Ideal for frequent or urgent temporary lighting works, the LIGHTING TROLLEY can be easily transported by one person and the kit comprises the Lumaphore light, telescopic mast and power pack.

It requires very little maintenance and can be quickly set up and ready for use, which makes it particularly well suited for urgent works or breakdown situations. The LIGHTING TROLLEY has been developed to make the Lumaphore a completely stand-alone system.

The standard kit comprises:

- 2 wheels (with inflatable tyres), 200mm diameter
- 1 **LUMAPHORE® LED**
- 1 telescopic mast with manual winch
- 3 retractable stabilizers
- 180° rotating joint
- 1 protective cover
- 1 support platform for the power unit (generating set or power pack)

The LIGHTING TROLLEY can be modified to meet your own specific site requirements; it can be fitted with wheels of 260 or 400mm to cater for particularly uneven ground conditions (ie. railway lines, gravel etc).

The LIGHTING TROLLEY is acknowledged for use by:

- Rail services
- Industrial maintenance services
- Airports

Benefits:

- easy to handle in one unit
- equipment ready for immediate use

WORKS MOBIL

Height when folded : 153cm

Height when extended : 400 cm

Size on ground when folded : 45 x 55 cm

Size on ground when extended : 115 x 150 cm

Net weight (without LUMAPHORE® or power unit) : 36 kg

- The LIGHTING TROLLEY has a hinge system making it more compact for easy moving and storage

- Protective cover

- Honda power pack on platform

- The 24V power pack or power units fit easily onto the platform

Swivel the LUMAPHORE®, place the power pack on the platform and the LIGHTING TROLLEY is ready to place in required location. Simply raise the mast using the winch and it's ready for operation.

- platform sized to take a power pack
- inflatable wheels or ready-inflated wheels
